- Threaded comments.
- Cross-browser compatible.
- Delivered with .png source files (.psd files available in the forum)

## HOW TO INSTALL THE THEME

Please unzip the '[limage\\_unzip\\_first.zip](#)' file that you received.

The theme is the '[limage.zip](#)' file inside the folder. In your WordPress administration area, go to '[Appearance -Themes](#)'. Click on '[Install Themes](#)' tab on top, then click '[Upload](#)' item in the new menu and browse for the '[limage.zip](#)' file in your computer and after locating it press the '[Install Now](#)' button and after that '[activate](#)' the new theme.

You can also install this theme the traditional way, by unzipping the '[limage.zip](#)' file, and upload the theme folder using an ftp client to the '[wp-content/themes](#)' folder of your WordPress installation.

After installing the theme, go to '[Appearance-Themes](#)' in your WordPress administrator area, and click the '[activate](#)' link of the newly installed theme. The theme is now the active one.

## THEME OPTIONS PANEL

The theme has an options panel that can be reached at 'Appearance-Theme Options'. Please take a look at some options you have available. You can also use the WordPress customization panel that can be reached at 'Appearance-Customize'.

## USING AN IMAGE AS LOGO

You have to upload your logo image in the Media Manager, and enter the image url in the Logo Image Location field, in the theme panel. You need to check the box that enables the usage of a logo image.

You can also switch to text logo from the theme panel.

## CONFIGURING THE MENU

The theme uses in full the WordPress custom menu navigation system. There is one menu location in this theme: the 'Main Menu'.

You need to go to 'Appearance – Menus' in your WordPress admin to start configuring your menu. You first need to create a menu in the right side and then from the left you can select the pages and categories you want to be part of each menu. Don't forget to click 'Save Menu' after you add the items. *Note that you have to have created your pages and categories first and they will be available in the list to include in the menu.*

In the bottom of your menu area you can select the location where you want the new menu to be assigned.

To enable dropdown in the menu interface, you have to drag the menu items below another menu item (child item).

## FEATURED IMAGES

When you edit a page or post, in the bottom of the right column you have an area called *Featured Image*. Click on the [Set Featured Image](#) link and you will be taken in the image uploader interface, where you can upload or select one of the existing images. Make sure that after you view your image press the '[Use as Featured Image](#)' link. The image will be resized and cropped to fit your thumbnail size.

You can use the featured images on both posts and pages in this theme.

## SETTING UP GALLERIES

The galleries are category based. First create a category, or you can create a category directly when you create a new post.

Add a new post and select the category for this post. In the bottom of the right column add a featured image to the post and Publish it. That's it. You need to create as many posts for as many images you want in the gallery. To display the galleries in the menu you need to include the categories in the Main Menu from the WordPress Menu Manager.

To feature one of your images in the front page, there is a section in the top of the right column when you edit a post 'Feature Post in the Front Page'. Just select the 'Feature' button and the post will display in front. You can 'Unfeature' it at anytime.

## THE BLOG PAGE TEMPLATE

First create a category name blog and add posts to that category.

After that create a page, you can name it whatever you want, and in the template selection dropdown select the '[Blog Page](#)' template.

## THE WIDGETS

This theme has a widget ready section in the bottom of the website which is called 'Bottom Widgets'. Go to 'Appearance-Widgets' to add your desired widgets. If you want different widgets in different sections of your website you can use the Widget Context plugin that can be found in the WordPress Plugin Repository.

## CSS ELEMENTS

The theme comes with a set of custom styled elements that you can use in any page, post or widget. You need to write the html code in the 'Text' view of the page/post.

### Buttons Code:

```
<a href="url" class="button black">Button text</a>
```

you can change the class 'black' to another color. Available colors are [gray-white-orange-red-blue-green-pink](#).

### Boxes Code:

```
<div class="alert">This is an alert box. </div>
```

```
<div class="cart">This is a cart box. </div>
```

```
<div class="doc">This is a document box.</div>
```

```
<div class="download">This is a download box. </div>
```

### Columns Code:

```
<div class="half"> some text </div>
```

```
<div class="onethird"> some text </div>
```

```
<div class="twothirds"> some text </div>
```

Best regards,

The Viva Themes Team
